

Diacon[®]-D IGR

A dry formulation insect growth regulator designed for locations where water is scarce. Diacon[®]-D IGR is a ready-to-use option for controlling insects at on-farm and off-premise storage sites.

FEATURES

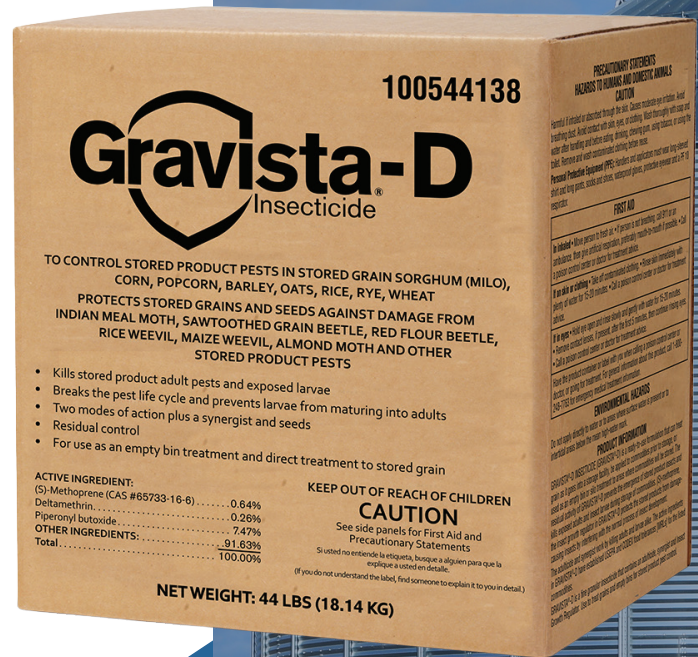

- Ready-to-use formulation
- Labeled for all stored commodities
- The active ingredient (S)-Methoprene
- Application to the grain stream
- Application as an empty premise treatment
- CODEX Approved

APPLICATION METHODS

Application of Diacon-D IGR is approved virtually everywhere stored product insects are a problem – farm storage, large silos, peanut bins, seed storage and more. It goes where stored product insects go, interrupting their life cycles, providing long-term control and profit protection.

TARGET INSECTS

Indian meal moth, red flour beetle, confused flour beetle and other pests (see label)

ACTIVE INGREDIENTS

- (S)-methoprene

SAFE • EFFECTIVE
