

Diacon[®] IGR

A versatile liquid formulation that is excellent for control of lesser grain borers, Indian meal moths, saw-toothed grain beetles and other stored product insects.

FEATURES

- Broad-spectrum control
- Apply directly to grain stream
- Apply as a fogging concentrate or a surface spray
- CODEX Approved
- CODEX Approved for Peanuts

APPLICATION METHODS

Application of Diacon[®] IGR is approved virtually everywhere stored product insects are a problem – farm storage, large silos, seed storage and more. It goes where stored product insects go, interrupting their life cycles, providing long-term control and profit protection.

TARGET INSECTS

Indian meal moth, red flour beetle, confused flour beetle and other pests (see label)

ACTIVE INGREDIENTS

- (S)-methoprene

SAFE • EFFECTIVE
