

GRAVISTA-D

Treating post-harvest grains is essential for effective protection against insects, and treating grain stored on-farm has never been easier. With Gravista®-D Insecticide, the only dual-purpose, dry product on the market that combines a synergized adulticide with an insect growth regulator. This dry formulation product can be applied directly on post-harvest grain streams. Containing an adulticide, an insect growth regulator (IGR), and a synergist, Gravista®-D Insecticide is an ideal solution to protect on-farm stored grains from the elusive weevil and other labeled insects.

FEATURES AND BENEFITS

- Combines a synergized adulticide with an insect growth regulator
- Ready-to-use formulation
- Non-restricted use
- 11 lb. per 1,000 bu. of grain
- Helps control weevils and other pests
- Offers residual control
- Application to the grain stream and/or as an empty bin treatment
- CODEX approved for cereal grains

APPLICATION METHODS

Apply directly to grain stream at a rate of 11 lb. per 1000-bushel grain. Refer to label for application rates.

TARGET INSECTS

Indian meal moth, sawtoothed grain beetle, red flour beetle, rice weevil, maize weevil, lesser grain borer, and other listed pests. See label for complete listing.

ACTIVE INGREDIENTS

- Deltamethrin: sodium channel modulator
- Piperonyl butoxide: synergist
- (S)-Methoprene: insect growth regulator
