

PBO-8[®] Synergist

A synergist for many classes of insecticides, PBO-8[®] Synergist works by blocking production of mixed-function oxidase enzymes, which insects use to metabolize the insecticide's active ingredients. By blocking the action of these enzymes, PBO-8[®] Synergist improves the efficacy of the insecticide.

FEATURES

- Synergizes many insecticides, including pyrethroids
- Works with most misting, fogging or spray equipment
- Favorable toxicological profile – low risk to humans and environment
- Excellent resistance management tool

ACTIVE INGREDIENTS

- Piperonyl Butoxide 91.3%

SAFE • EFFECTIVE
